### How to order a Circuit Breaker Retrofit Kit by Catalog Number:

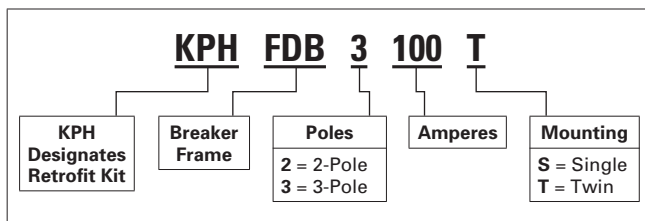

Use “KPH” or “KPHL” prefix and add the breaker type and rating designations as shown below. Use suffix of “T” or “S” to denote twin or single mounting.

Twin mounting indicates that only one set of connectors is required to mount two breakers (of similar frames) opposite one another.

Retrofit kit includes **one breaker only** — whether for single or twin mounting.

**Example:** The Retrofit Kit catalog number for a 3-pole, 100 ampere, FDB breaker, single mounted in a PH panelboard is:

**TABLE 5. RETROFIT KIT CATALOG NUMBERING**

## MP40 Panelboard Circuit Breaker Retrofit Kits

Complete kit includes one breaker, connectors, necessary hardware and instructions to branch mount on an MP40 or CDP panelboard chassis. (Also installs in MP200 switchboards.)
